

DASH View

Open a window for your customers.

DASH View is one of ServiceFirst Restoration's most unique and powerful tools. It allows for the ability to share information about a specific job with a customer through an e-mail link. This e-mail link allows the customer to review specifics about the job they are associated with including information about dates, the job details, insurance, the broker/agent, the adjusters, the property manager, photos, and notes. It gives the customer, insurance agent, or adjuster the ability to know what is going on with the job they are associated with without having to call or e-mail ServiceFirst Restoration. It makes for a better relationship between the two and increases workflow efficiency.

Customer: Nelson, Roger **Claim Number:** **Estimate: \$57,605.70** **Contractor: NGS Demo** **Status: Pre-Production**
